CLERK: 25 ayes, 0 nays, Mr. President, on the advancement of 202.

SPEAKER BAACK: LB 202 is advanced. Before we proceed to the next bill I would like to introduce a guest of Senator Lowell Johnson who is under the north balcony, and his name is Mr. Phil Fredrickson and he is from North Bend. Would you please stand and be recognized by your Legislature. Thanks for being with us. Mr. Clerk, LB 258.

CLERK: 258, Mr. President, introduced by Senator Elmer. (Read title.) The bill was introduced on January 14, referred to Transportation Committee, advanced to General File. I have no amendments to the bill.

SPEAKER BAACK: Senator Elmer.

SENATOR ELMER: Thank you, Mr. Speaker and members, ever since I've been driving I've been wondering what the rationale is when the law states that you must turn on your headlights one-half hour after sunset and turn them off again one-half hour prior to sunrise. This bill merely changes the time for turning your headlights on and off to sunset and sunrise. The half hour before and half hour after rationale I think could be applied to agricultural equipment. So in this bill agricultural equipment such as tractors and combines, in addition, are left at a half hour before and after because many agricultural people work daylight hours in their fields. All of those have different types of lighting arrangements on them anyway such as slow moving vehicle stickers, rotating lights to show that they are slow moving and such as that. And I think that for safety purposes to avoid confusion on the part of the drivers as to when a half hour before and after is, this is a logical change to make in headlight law and I'd ask for your advancement to Select File.

SPEAKER BAACK: Anyone wishing to speak on the bill? Senator Warner.
